Medical Student Research Opportunities in Cancer Research at Moffitt!

The Ponce Health Sciences University and Moffitt Cancer Center U54 Partnership is accepting applications from Medical students **from the University of South Florida** interested in an 8-week internship in Cancer Research at Moffitt Cancer Center.

The primary goal of this program is to allow cross-institutional training of students from MCC/USF and Ponce Health Sciences University (PHSU) in multi-disciplinary areas of cancer and health outcomes. There will be collaboration opportunities with faculty and students from PHSU. Students will actively participate in research, career development workshops, mentoring, and educational courses including, health outcomes and molecular tumor boards.

Application Deadline:
January 15, 2027

$6,000 Stipend Provided
